

Culmen awarded contract to support the Naval Air Systems Command's (PMA-201) Aircraft Armament and Fuel Containment Systems Programs

WASHINGTON, September 30, 2017 - Culmen International, LLC, an internationally recognized Program Management, Logistics, and Technical support company, was awarded a contract to support the Naval Air Systems Command's (PMA-201) Aircraft Armament and Fuel Containment Systems Programs.

"Culmen International is honored to have this opportunity to support the Department of Navy in recovering and reclaiming critical equipment and components to meet the Naval warfighter's needs." said Dan Berkon, CEO of Culmen International. "This contract allows Culmen to work directly in support of the Program's Managers, Logisticians, and Engineers in executing Reclamation In Lieu Of Production (RILOP), a program designed to reduce life cycle costs."

Culmen will assist by providing Program Management and sustainment support, including logistics and technical support services for armament equipment, aerial refueling stores, and associated equipment utilized by PMA-201 customers. Culmen will be responsible logistic support for up to 6000 individual items with multiple configurations. Culmen will provide Program Manager support and Subject Matter Expertise in the disassembly, inspection, segregation, storage, transportation, and disposition of this critical equipment.
