

K2 Construction Consultants Wins \$253 Million DHS Radiation Portal Monitor Deployment, Construction and Design Contract

K2 Teams with Parsons Corporation and Culmen International

BETHESDA, MD (October 12, 2023) – K2 Construction Consultants has been awarded a five-year, indefinite-delivery, indefinite-quantity contract with a ceiling value of approximately \$253 million by the Department of Homeland Security (DHS) Countering Weapons of Mass Destruction Office (CWMD) to deploy technology designed to detect and prevent nuclear and radiological material or devices from entering the United States. K2 partnered with Parsons Corporation (NYSE: PSN) and Culmen International to win the Radiation Portal Monitor Program (RPMP) Deployment contract.

The K2 team will deploy radiation portal monitors (RPM) across the US-Mexico and US-Canada borders and at international airports, seaports, and global postal facilities, in support of U.S. Customs and Border Protection (CBP).

“We are excited to expand our support of DHS to the CWMD mission from our many Transportation Security Administration (TSA) programs installing security screening systems and technology,” said Paul Krogh, chief executive officer of K2 Construction Consultants, Inc. “The team brings extraordinary capabilities and wide-ranging expertise for the development of threat reduction systems, integration of security screening technologies, as well as program and logistics management, procurement, and construction.”

“The critical importance of preventing nuclear and radiological material from entering the United States cannot be overstated,” said Jon Moretta, president, Engineered Systems for Parsons. “Working closely with K2, Culmen and DHS, we look forward to deploying technologies to help ensure the continued protection of American citizens and success of the RPMP mission.”

The K2 team will perform site surveys and designs, equipment installation, configuration management, and commissioning.

“Culmen’s capabilities and experience provides the Government with unique resources and expertise needed to fulfil the CWMD RPMP mission,” said Dan Berkon, CEO of Culmen International. “Culmen is proud to be part of the K2 team enhancing US and international security by implementing radiation portal monitoring solutions at critical sites.”

“We have assembled the strongest team in the industry to execute this important mission for CWMD,” said Paul Krogh. “K2, Parsons and Culmen are ideally positioned because of our exceptional track records with DHS, TSA and CBP.”

About K2 Construction Consultants

K2 Construction Consultants, Inc, is an industry leader in project management and controls, systems integration and the deployment and implementation of complex security solutions. For three decades, K2 has successfully supported a diverse range of domestic and international projects for Fortune 500 companies, government agencies and large airports and transportation authorities.
